

## Jewett Completes Several Projects in New England

SEAA member Jewett Metal Buildings & Steel Erectors (JMB), a division of Jewett Construction Co., Inc., recently completed multiple projects in New Hampshire, Maine and Massachusetts.

Working under Wright-Ryan Construction, JMB erected 14,000 square feet of structural steel for a new Agren Appliance store in Topsham, Maine. At Corning's Kennebunk, Maine facility, Jewett erected 4000 square feet of structural steel and a mezzanine under Precision Welding. While working under Hebert Construction, JMB reinforced an existing structure at the MHG Ice Center in Saco in preparation for an expansion of the existing arena—a fast-track job with completion required prior to the July ice season. JMB also installed channels, beams and rod supports to the Thornton Academy library.

Other Maine projects included installing column beams and a deck canopy at the University of New England's Decary Hall in Biddeford under James McBrady Steel, and renovating the Portland Schools' central kitchen under Langford & Low.

In New Hampshire, JMB erected structural steel beams and columns for a new facility at 1400 Lafayette Rd., Portsmouth, while working under Shawmut Steel. In Massachusetts, Jewett provided upgrades and metal siding replacement at Interstate Electric's facility in Billerica.

Working with parent company, Jewett Construction, JMB installed a structural steel canopy at Rt. 44 Toyota in Raynham, MA; erected a 9,000-square-foot Corle pre-engineered metal building at Pinkerton Place in Derry, NH; provided demolition and a 255-square-foot mezzanine for the new SIG SAUER corporate headquarters in Newington, NH; and provided miscellaneous metals work and siding installation at Suburban Subaru in Vernon, Connecticut.

Jewett Metal Buildings & Steel Erectors—a member of the Metal Building Contractors and Erectors Association, and Steel Fabricators of New England—provides professional, pre-engineered metal building sales, installation and consulting, erects structural steel, and provides welding and miscellaneous metals work to clients all over New England.
