## Member Spotlight: Jewett Metal Buildings & Steel Erectors

Jewett Metal Buildings & Steel Erectors, a division of the 40-year-old, family owned Jewett Construction Co., Inc., is a leader in the pre-engineered metal building industry. Based in Raymond, New Hampshire, the firm provides professional, pre-engineered metal building sales, installation and consulting; erects structural steel; and provides welding and miscellaneous metals work to clients in New England, NY, NJ, and PA.

Jewett Metal Buildings combines a proven track-record of excellence with the empathy of a General Contractor.

All company staff take pride in

craftsmanship and strive to exceed customers' expectations through hard work, attention to detail, and by building and maintaining strong business relationships. Customer service is paramount, so all employees work closely with clients to ensure that all projects meet tight scheduling deadlines.

Jewett Metal Buildings & Steel Erectors' projects run the gamut—additions, renovations, and new construction for everything from hazmat storage facilities, freezer plants and airplane hangars; to mini malls, warehouses and manufacturing facilities; and, in conjunction with parent company, Jewett Construction Co., Inc., many high-profile automotive dealerships, including a recently completed, 77,000-square-foot, LEED-certified Toyota dealership.

In addition to running its own division and often working hand-in-hand with its parent company, Jewett Metal Buildings & Steel Erectors also contracts with other general contractors in the New England area who seek quality metals work on jobs as diverse as FedEx warehouse and distribution facilities, marinas, sports complexes, retail stores and municipal complexes.

The company's project management team adheres to the highest performance and safety standards and can boast a safety MOD rate that remains an outstanding example in the construction industry today. The project managers are diligent about budget and scheduling, working with on-site project supervisors and

field personnel to ensure that steel components arrive on the construction site in a timely manner and are erected on schedule.

Besides participation in the Steel Erectors Association of America, Jewett Metal Buildings & Steel Erectors is also a member of the Metal Building Contractors and Erectors Association and the Steel Fabricators of New England.
