

"We bring it all together"
STEEL ERECTORS ASSOCIATION OF AMERICA

Member Spotlight: Stud Welding Associates, Inc.

Since its inception in Elyria (Cleveland), Ohio in 1982, Stud Welding Associates, Inc. has grown to become one of the largest manufacturers and distributors of stud welding products in the U.S.

The company's product line includes all types of studs, accessories and equipment while providing service to all makes and models. The company also provides technical assistance, application development, and certification programs.

Products manufactured by Stud Welding Associates comply with all required industry standards such as American Welding Society ANSI / AWS D1.1 Welding Code, British Standards 5950 and 5400, and Canadian Welding Bureau CSA W59 to name just a few. Standard stud products manufactured by Stud Welding Associates are manufactured from ASTM A 108 or ASTM A-496 mild steel or 18/8 stainless steel grades. Other material grades are available upon request.

Strict adherence to quality control procedures registered to ISO 9001 standards ensures customers receive quality products. Furthermore, Stud Welding Associates has complete traceability to mill material test reports and provides its customers with certification of each heat number purchased.

The company maintains a full range of weld studs, stud welding systems, accessories, and rental equipment in stock at the Elyria manufacturing facility as well as at company warehouses across the United States. To provide the best technical support, through a direct sales force and distributor customers, Stud Welding Associates has brought together a resource group of over 40 professionals representing over 600 years of experience in the stud welding industry.
