

## Training Courses in Spanish Now Available from IPAF

Following requests at the IPAF Summit in Miami, the International Powered Access Federation (IPAF) has launched American Work Platform Training (AWPT) courses in Spanish.

Managed in the US and Canada by IPAF's North American subsidiary AWPT, the aerial work platform (AWP) operator course is now available in Spanish as part of IPAF's continuing commitment to provide training and safety materials in other languages.

IPAF USA and AWPT executive vice-president, Tony Groat, called on the industry to make full use of this new service, saying, "We open up the challenge to those in the industry. Get your employees trained in a manner they can understand for safe AWP operations. The material and the tools are there and there is no excuse for untrained workers when working at height."

The AWPT Spanish course will be available at approved training centers, including the Valcourt Exterior Building Services based in New Jersey. The AWPT eLearning module will be available in Spanish by the end of September.
